AMENDMENTS OF THE CLAIMS

This listing of the claims will replace all prior versions and listings of claims in the application:

Listing of Claims

1-60 (Canceled).

61. (Currently Amended) A method for generating a virtual representation of ~~a device~~ one of a plurality of devices using a template document comprising:

associating each of the plurality of devices with respective display components;

retrieving a template document comprising a layout specifying an arrangement of display components, wherein the template document supports the plurality of devices;

retrieving ~~at least one of the display components~~ a display component for the device;

inserting the ~~at least one~~ display component into the template document; and

generating the virtual representation for the device using the template document ~~containing the at least one display component~~.

62. (Previously Presented) The method of claim 61 wherein the template document is retrieved from a remote database.

2

63. (Previously Presented) The method of claim 61 wherein the template document is retrieved from the device.

64. (Previously Presented) The method of claim 61 further comprising selecting the template document from a plurality of template documents.

65. (Previously Presented) The method of claim 64 wherein the template document is selected based on display language, remote user access device type, or time of day.

66. (Previously Presented) The method of claim 61 wherein the at least one display component corresponds to a component on the device.

67. (Previously Presented) The method of claim 61 wherein the at least one display component does not correspond to a component on the device.

68. (Currently Amended) A system for generating a virtual representation of a device one of a plurality of devices using a template document comprising:

means for associating each of the plurality of devices with respective display components;

means for retrieving a template document comprising a layout specifying an arrangement of display components, wherein the template document supports the plurality of devices;

means for retrieving ~~at least one of the display~~ ~~components~~ <u>a display component</u> for the device;

means for inserting the ~~at least one~~ display component into the template document; and

means for generating the virtual representation <u>for the device</u> using the template document ~~containing the at~~ ~~least one display component~~.

69.   (Previously Presented)   The system of claim 68 wherein the template document is retrieved from a remote database.

70.   (Previously Presented)   The system of claim 68 wherein the template document is retrieved from the device.

71.   (Previously Presented)   The system of claim 68 further comprising means for selecting the template document from a plurality of template documents.

72.   (Previously Presented)   The system of claim 71 wherein the template document is selected based on display language, remote user access device type, or time of day.

73.   (Previously Presented)   The system of claim 68 wherein the at least one display component corresponds to a component on the device.

4

74. (Previously Presented) The system of claim 68 wherein the at least one display component does not correspond to a component on the device.

75. (Currently Amended) A ~~system for generating a~~ virtual representation of ~~a device~~ one of a plurality of devices using a template document comprising:

a processor programmed to:

associate each of the plurality of devices with respective display components;

retrieve a template document comprising a layout specifying an arrangement of display components, wherein the template document supports the plurality of devices;

retrieve ~~at least one of the display components~~ a display component for the device;

insert the ~~at least one~~ display component into the template document; and

generate the virtual representation for the device using the template document ~~containing the at least one display component~~.

76. (Currently Amended) The ~~virtual representation~~ system of claim 75 wherein the template document is retrieved from a remote database.

77. (Currently Amended) The ~~virtual representation~~ system of claim 75 wherein the template document is retrieved from the device.

78. (Currently Amended) The ~~virtual representation~~ system of claim 75 wherein the processor is further programmed to select the template document from a plurality of template documents.

79. (Currently Amended) The ~~virtual representation~~ system of claim 78 wherein the template document is selected based on display language, remote user access device type, or time of day.

80. (Currently Amended) The ~~virtual representation~~ system of claim 75 wherein the at least one display component corresponds to a component on the device.

81. (Currently Amended) The ~~virtual representation~~ system of claim 75 wherein the at least one display component does not correspond to a component on the device.
